

December 7, 2023 Climate Advisory Committee Meeting Minutes

Charrette:

Rita Sebastian reported on the status of the town Charrette initiative. The town is currently waiting on the legal counsel's review as per Corey..

Registry

Sherrill Howard mentioned that the town police dept. has a program called "Good Morning Police" which has some similarities to the registry for vulnerable citizens that has been discussed in the climate committee. The program is different however in that it is targeted toward people who need daily check-ups rather than supporting the vulnerable during emergencies related to weather or other issues.

Community power

The new website camptonCommunityPower.com was demonstrated and an overview of activities by the community power committee was provided by Bill Sebastian. Two public sessions are being scheduled.

Discussion regarding tasks needing to be done in preparation for the public meeting on the 20th.

Solar

The climate committee is still waiting for the town to select a suitable site for the solar panels. Sherrill provided an update on town efforts to secure a site for this purpose.

Climate committee

Rita plans to write a report on the committee activities for inclusion in the town report to be distributed at the 2024 town meeting.

Our PPT presentation on the town website.
